

Futura 3.2

TECHNICAL DATA

VOLTAGE

400 Volt 50 - 60 Hz

POWER

1,5 kw

SIZE

0,90 X 1,30 X 2,00 mt

WEIGHT

600 Kg

What makes *Futura 3.2* automatic gluing machine unique is the **OPTICAL DETECTION** of the profile, a technological system that does not need manual centering of the sole, thus allowing a free positioning to gain considerably on the timing of this processing phase.

OPTICAL DETECTION OF THE SOLE

HIGHLY PRECISE AND HOMOGENEOUS GLUE DISTRIBUTION

Futura 3.2 adapts to every type and shape of the sole and to every types of glue present on the market. It guarantees a homogeneous and efficient distribution together with a strong glue saving.

The high productivity and the simplicity of management allow the operator to take care of only loading and unloading thus saving time to be used in other activities.
